Nancy,

I sent the attached to Paige on Saturday.

The full QAPP is being scanned today, Monday.

Maria

LDEQ Sampling Plan and QAPP addendum

Maria Martinez

Paige,

The attached are LDEQ's latest Sampling Plan and QAPP air monitoring.

Could you send me the DEQ sampling plan and QAPPs?

Subject: Relevant Information Concerning Data Generation for Louisiana State-run sites

Nancy,

The following sampling and data review apply to Louisiana (above and beyond what is being conducted by Region 6's contractor):

LDEQ Sampling at Kenner and Chalmette-Vista Stationary Sites:

- VOCs: Increased sampling from 1 every 3 days to every 24 hour canister samples. Also, taking 8-hour samples if trigger level of 1.0 ppm TNMOC (Kenner) and 2.0 ppm TNMOC (Chalmette-Vista) are exceeded. 8-hour samples will continue to be taken at each of the stations until the ambient concentrations fall below the trigger levels. Samples are being analyzed by Region 6's contractor with a 24-hour turnaround time.
- PM2.5: Continuous, real-time PM2.5 sampling is being conducted at the two LA stationary sites. Data and air quality index forecasts are being posted on AirNow (www.airnow.gov)

LDEQ's Ambient Air Monitoring Network (beyond Kenner and Chalmette-Vista sites):

- LDEQ will be generating daily air quality data assessment reports and supplying them to Region 6
- The reports contain summary data for H2S, SO2, and TNMOC

Relevant Sampling Plans, QAPPs and SOPs for the above sampling and analysis are on file with our Section (6PD-Q, Air Quality Analysis Section).

Let me know if you have any questions.

Maria
